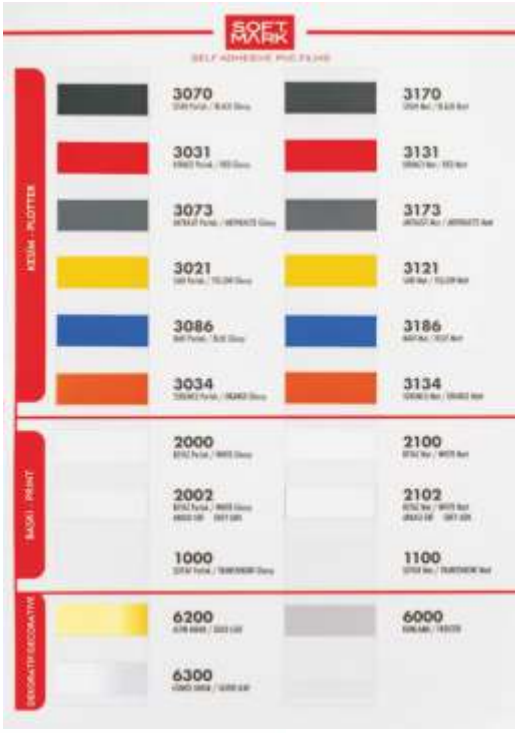
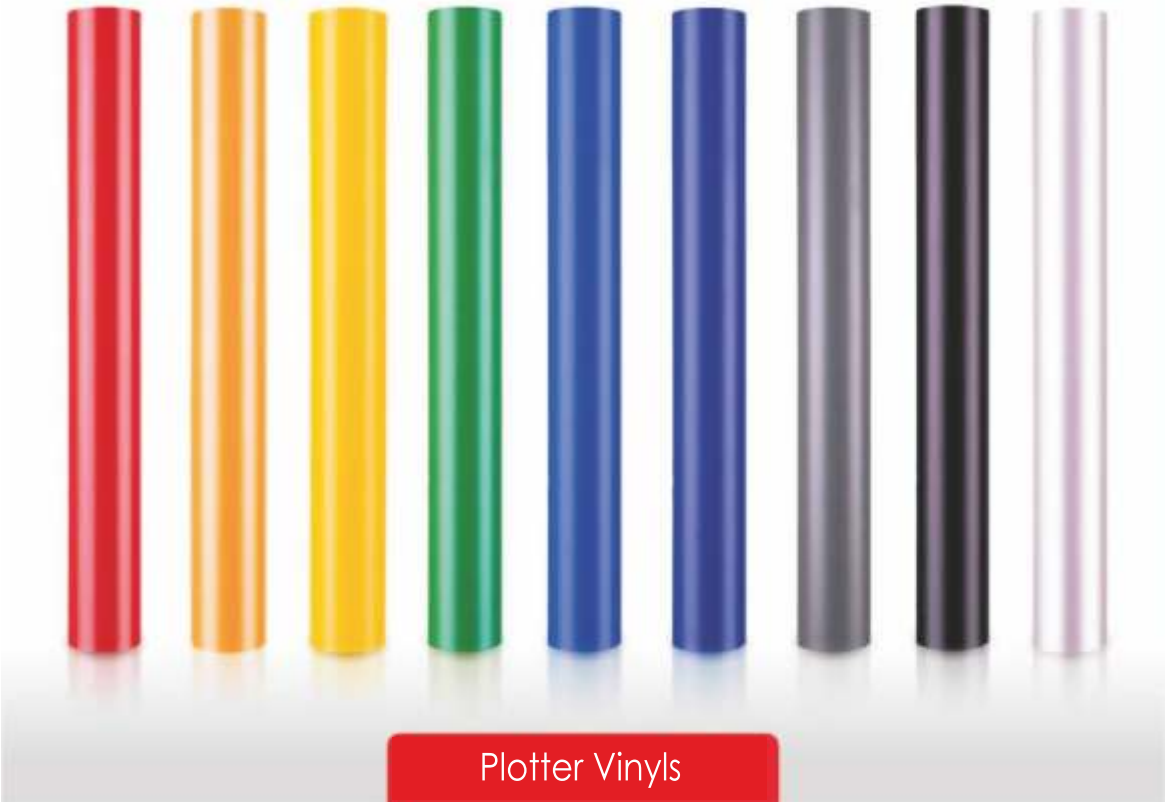
Plotter Vinyl

It consists of 70 micron PVC, 138 g carrier paper.
We work with Europe's leading PVC,
paper and adhesive suppliers for vinylproduction.
Softmark plotter vinylconsists of 9 main colours
in matt and glossy.
The vinylis cut during application and can be easily
removed without burrs.



SOFT MARK

SELF ADHESIVE PVC FILMS



The service life and durability of cutting VINYLs make them an economical choice for short and medium-term jobs. More efficient results can be achieved especially on non-illuminated signage, window displays and flat surfaces. It can be used frequently in indoor environments such as trade fairs, congresses, festivals and on flat surfaces such as signs, glass, showcases, facades and signposts, but can also be used effectively in the field of vehicle lettering and decoration.
